

Statement Regarding New Force Levels for Sting Ray Anchors

PVB 11/9/12

MPS dba Foresight Products strives for continuous product improvement as part of our commitment to provide increased value to our customers.

In that light, Foresight has succeeded in increasing the Ultimate and Working Loads on its Sting Ray anchors. The Sting Rays (SR-1, SR-2 and SR-3) have been put through a thorough and rigorous testing procedure to evaluate the new force levels.

Foresight is proud to announce the increased strength of these anchors as follows (Working Load values are always soil dependent):

Ultimate Force:	120 kips
Maximum Working Load:	81 kips

Please contact Engineering if you have any questions on this information or require further clarification.
